-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-11, 15-18, 21 and 22 remain rejected under 35 U.S.C. 102(b) as being anticipated by Chao-Ching et al. (6,074,069).

Chao-Ching discloses a light guide plate having grooves in a snaking pattern formed on a transparent plate. The groove are V-shaped [column 2, line 52-53] may be smooth or coarse [column 2, line 55-56] and may be formed by cutting [column 3, lines 6-7], inherently by a V-shaped cutter. A light [5] is disposed on the edge of the light guide plate. Figures 5 and 6 disclose intersecting grooves: the first set of grooves is unparallel to the second so that the grooves intersect. Claim 5 shows grooves in a section of a sinusoidal wave. Chao-Ching discloses that his device may be used in the fabrication of LCDs [column 1, lines 11-12]. Figure 1 discloses straight non-contiguous line segments are known in the art.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 19 and 20 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Chao-Ching et al.

Chao-Ching discloses snaking patterns and straight line patterns but does not disclose the claimed patterns of a snaking pattern combined with a straight light pattern, two snaking patterns having phases which differ by 180 degrees, two patterns of grooves surrounding hexagonal areas. To choose snaking patterns to achieve a desired illumination result is well within the scope of one versed in the art.

***Allowable Subject Matter***

Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

With respect to claims 13 and 14, note applicant's arguments in the "Remarks" section of the amendment of 11/5/07.

### ***Response to Amendment***

Applicant argues that the prior art does not teach "v-shaped grooves" but instead teaches "convex diffusion units". The diffusion units of the prior art are in fact grooves and they have a v-shaped cross sections. Applicant should concentrate the claims on the structure of the device and the difference between this structure and the structure of the prior art.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
